

# Meet HMS

## How tapping the broadest range of cost containment solutions in healthcare can strengthen your plan

**HMS is enterprising healthcare. We provide the broadest range of healthcare cost containment solutions in the industry – all to help payers like you improve performance.**

Back in 1974, HMS identified the multi-billion-dollar problems of Medicaid coordination of benefits, creating a solution from scratch for providers. We adapted that solution to state agencies and then to Medicaid managed care organizations. Later we pushed beyond coordination of benefits into payment integrity – including Medicare – and data solutions for health plans, state and federal agencies, and employers.

Today we are the most comprehensive cost containment company for healthcare payers in America. Using innovative technology as well as powerful data services and analytics, our solutions cover the entire payment continuum:

Based in Irving, Texas, HMS has more than 2,300 employees in 25-plus offices across the country. We are a wholly owned subsidiary of HMS Holdings Corp., traded on NASDAQ (ticker: HMSY), and certified by HITRUST.

Most important, we save our customers billions of dollars a year in overpayment recoveries and billions more through the prevention of improper payments – targeting fraud, waste, and abuse; inappropriate claims; and ineligible claimants. We have one out of every three Americans under contract and strive to make the healthcare system better for everyone.

**Enterprising is HMS. And HMS is enterprising healthcare.**

### Services

**Coordination of Benefits Solutions**

**Payment Integrity Solutions**

**Data Solutions**

HMS provides the broadest suite of cost containment solutions in healthcare to help payers improve performance. Using innovative and time-tested technology and analytics, we prevent and recover improper payments related to fraud, waste and abuse. Using our services, customers recoup billions of dollars every year and save billions more through the prevention of erroneous payments.
